

we want to
share our
thoughts,

our interests,

+ ourselves,

to you.

We are humiddle,

a collective of Southeast Asian artists who share their stories through art, **together**. The group currently consists of five artists that cover multiple disciplines including music, graphic design, pottery, and other various mediums of art. Our name, **humiddle collective**, is a combination of humid and middle, referring to the humid weather in Southeast Asia and the artists' positions as middle children in their families.

The collective is open to growth as time moves on.
